JIRA REPORTS

Introduction

This Software Test Report (STR) was created as part of a QA course project, focusing on the **“Olive Young” mobile application**, an e-commerce platform for beauty and health products.

The goal of this STR is to document the test planning, execution, and outcomes, while supporting the development of practical skills and a deeper understanding of end-to-end software testing in a real-world context.

To manage and document the testing activities efficiently, I utilized **TestRail for writing and executing detailed test cases** across various categories, including functional and negative scenarios, GUI, compatibility, accessibility, and much more.

Additionally, I used **Jira for defect tracking, prioritizing issues based on severity and impact**, and ensuring seamless communication between QA and development teams.

This report reflects a methodical approach to mobile app testing, guided by industry best practices and a focus on delivering a high-quality digital product.

Purpose

The purpose of this project is to apply theoretical knowledge gained during the QA course to a practical, real-world scenario by testing the Olive Young mobile application.

Through this hands-on experience, I aimed to strengthen my understanding of the complete software testing lifecycle—from test planning and design to execution and defect reporting.

Ultimately, this project served as a platform to build confidence, improve technical QA skills, and understand the importance of structured, methodical testing in delivering high-quality digital products.

Application Overview

Olive Young is a popular mobile application developed by one of South Korea's leading health and beauty retailers.

Originally exclusive to the South Korean market, the app has recently expanded its services globally, making its wide range of cosmetics, skincare, and wellness products accessible to international customers.

The app offers a seamless shopping experience with features such as product browsing, search and filtering, customer reviews, promotions, personalized recommendations, and secure checkout.

It is designed to support both Korean and global users, with multilingual support and international shipping options.

With a strong focus on user experience, convenience, and accessibility, Olive Young continues to grow as a trusted platform in the global beauty and wellness e-commerce market.

Testing Scope

The testing focused on evaluating the quality, performance, and usability of the Olive Young mobile app across various mobile devices.

Key testing types included:

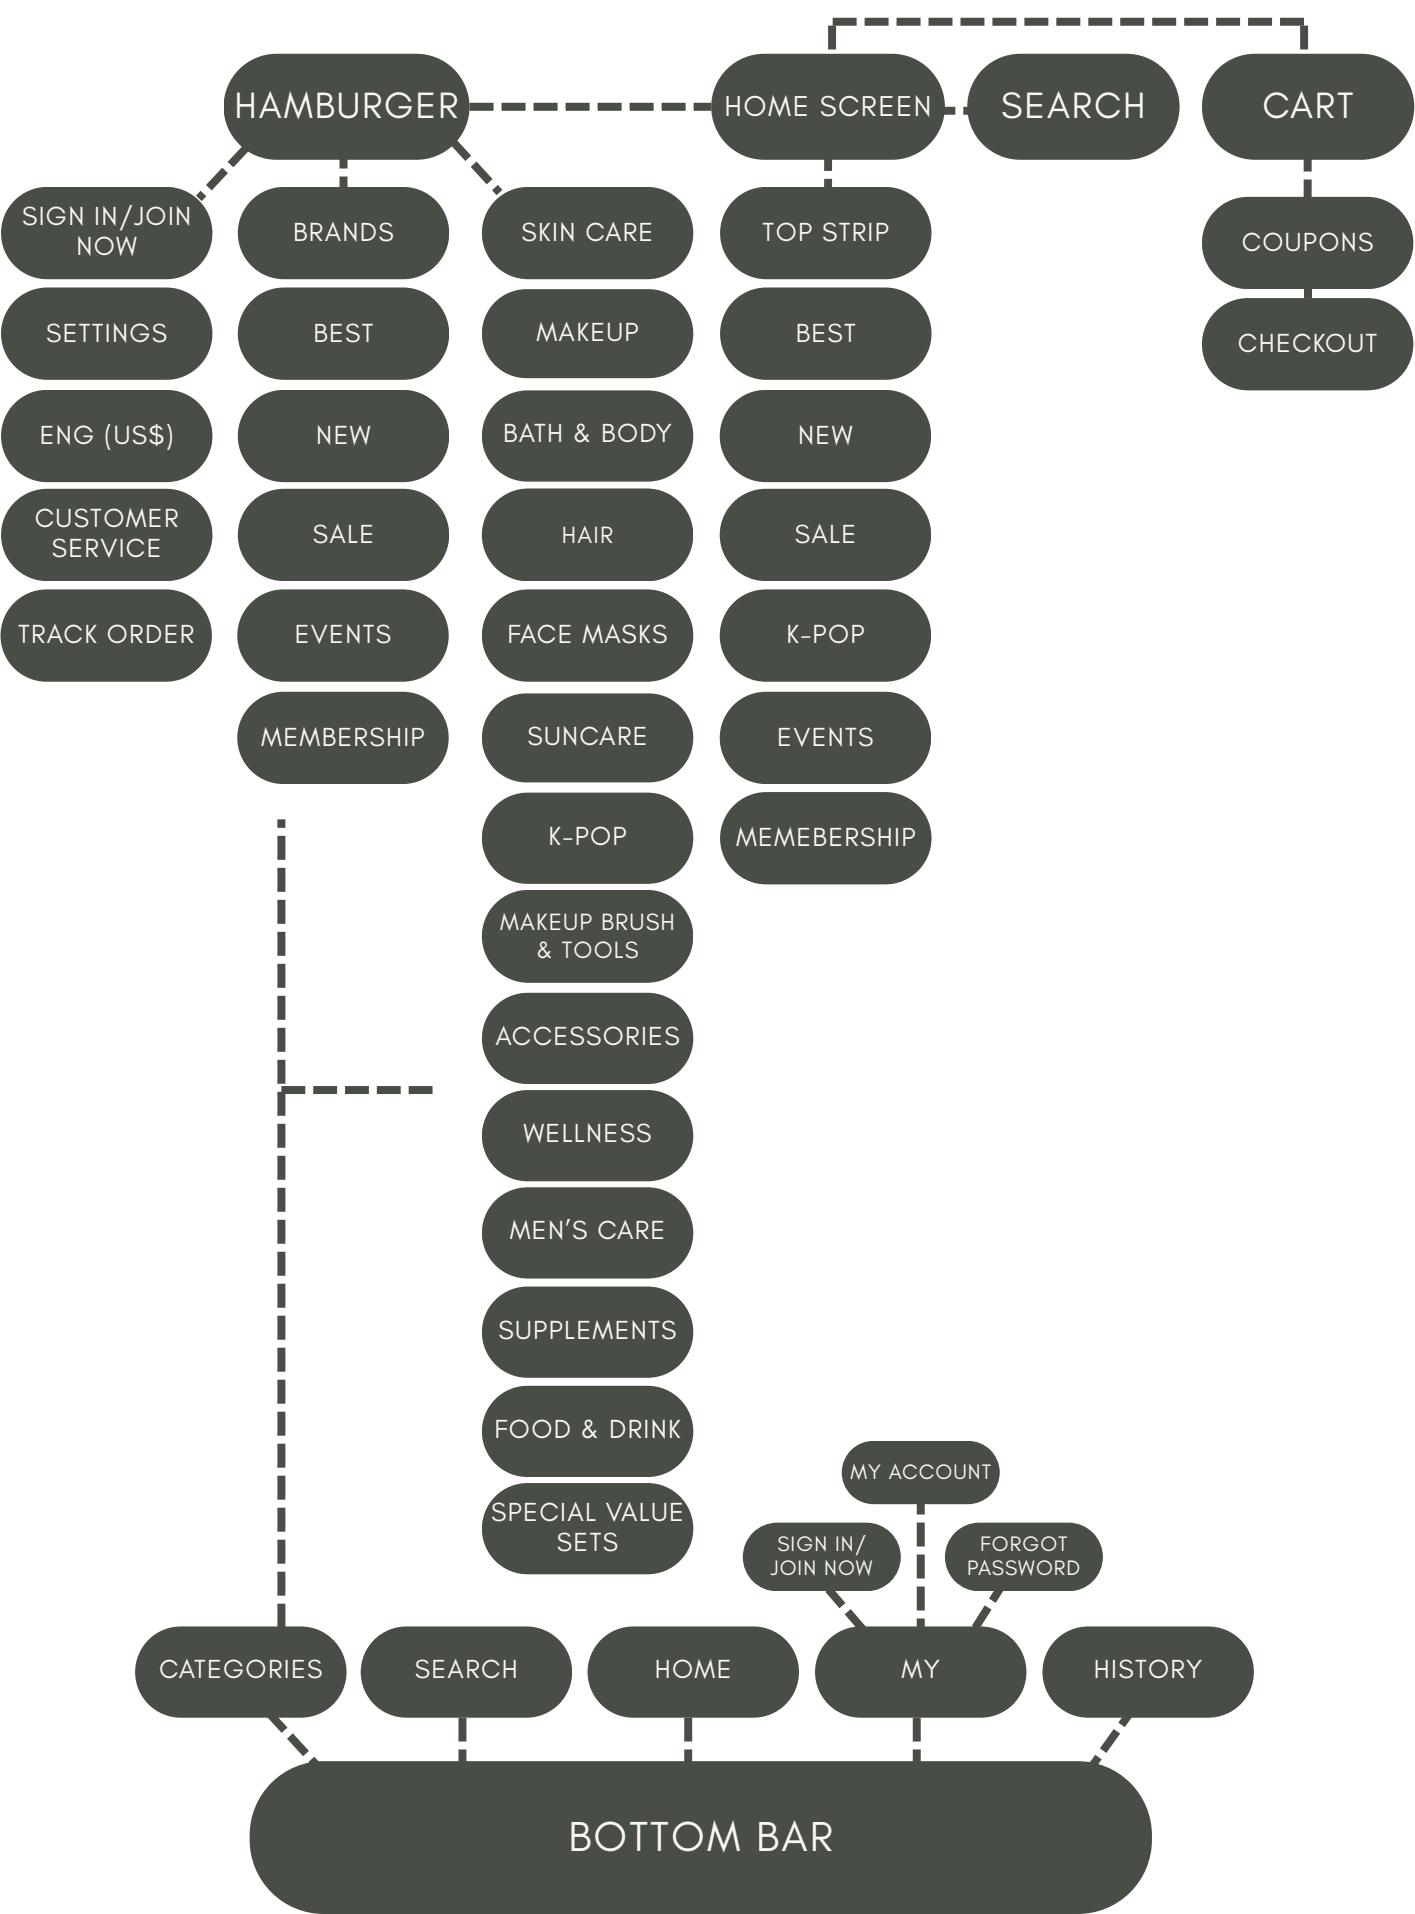

Installation, Sanity, Functionality, GUI, Usability, Compatibility, Accessibility, Interrupts/Notifications, Interface, Security, Performance, Stress/Recovery, and Localization.

Core areas tested:

- **User Registration & Login:** Data validation, secure sign-in, and smooth account creation.
- **Navigation & Menus:** Responsiveness, intuitiveness, and cross-device functionality.
- **Cart & Checkout:** Item management, quantity updates, discount application, and payment flow.
- **App Flow:** Screen transitions and logical navigation between sections.
- **Localization:** Accurate language, currency, and content for users outside South Korea.
- **Accessibility:** Screen reader support, color contrast, touch targets, and inclusive design.

Additional focus was placed on **screen loading times, crash handling, and ensuring a smooth shopping experience throughout the app.**

Testing Tree

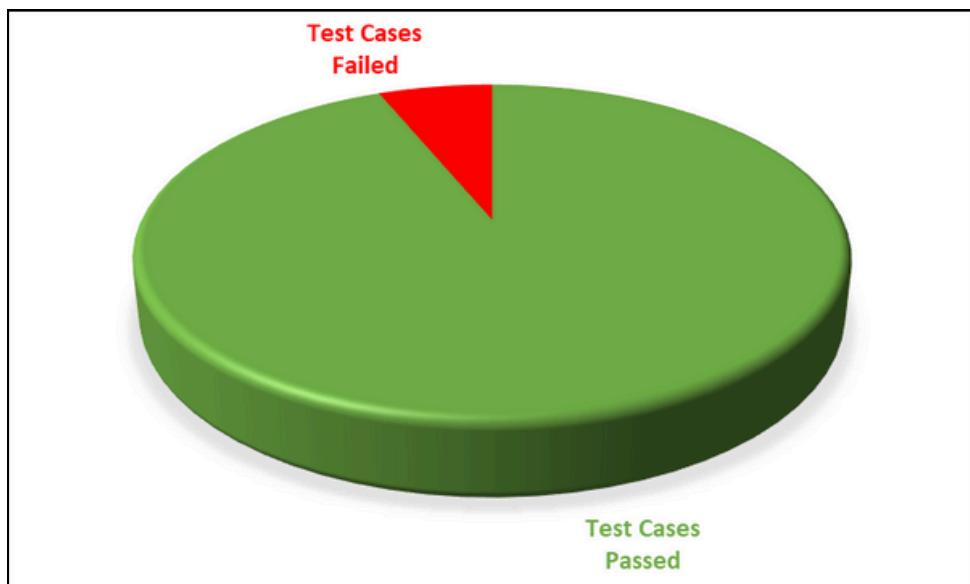

Metrics & Diagrams

Test Cases Status

Test Cases Planned	Test Cases Executed	Test Cases Passed	Test Cases Failed

Flowchart of bugs by Severity

Show Stopper	Critical	Major	Moderate	Low	Total
0	10	15	3	2	30

Flowchart of bugs by Testing Areas

Test Area	Critical	Major	Moderate	Low	Total
App	3	2			5
Bottom Bar		2	2	1	5
Join Now	1	1			2
Sign In	1				1
Forgot My Password	1		1		2
Hamburger		2		1	3
Home Screen		1			1
Top Strip		1			1
Cart & Coupons		4			4
Checkout	4	2			6

Exit Criteria

The Olive Young mobile app will be approved for release only if the following conditions are met:

1. **Critical & High Severity Issues**

- All Critical bugs (checkout failures, payment errors, app crashes) are fixed, retested, and closed.

2. **Major Severity Issues**

- All major bugs affecting key flows (cart loss after login) are fixed.

3. **Core Functionality Validated**

- Main user flows (login, cart, checkout, payment, buttons responsive) pass on supported devices.

4. **Performance & Stability**

- App loads key screens within acceptable limits and shows no major lags or crashes.

5. **Security & Session Handling**

- Session timeout works correctly, and no data is lost on login/logout or app backgrounding.

6. **Approvals Complete**

- Test results are reviewed and approved by QA and stakeholders.

Conclusion

After completing a comprehensive testing cycle of the Olive Young mobile application, I have identified a total of **30 bugs**, including:

10 Critical bugs - Primarily affecting core functionality, compatibility, and security, such as app crashes, unoptimized resolution on other devices, approving invalid credentials, and silent item removals.

15 Major bugs - Mostly related to performance and stability, including very slow screen loading times, unresponsive UI elements, inconsistent layout, and poor session handling.

5 Moderate and Low severity bugs - These impact translation accuracy and UI/UX layout, contributing to a lack of polish and usability.

Most severe bugs disrupt the purchase flow, prevent users from completing orders properly, and could expose the app to data quality or security risks.

These issues significantly affect both the reliability and user trust in the application. This may lead to user frustration, abandonment, and incomplete transactions.

Based on the current state of the application –
It is not recommended for release.

Recommendations

ORDERED BY PRIORITY

1. Fix Checkout, Payment & Cart Flow Bugs

- Resolve unresponsive or broken “Place Order” buttons.
- Prevent silent product removals during checkout (due to out-of-stock).
- These are critical for revenue and must be addressed before any release.

2. Improve Screen Load Performance

- Optimize loading times across major screens (home, cart, checkout).
- Delays longer than 3 seconds create friction and increase bounce rates.
- Investigate causes like image size, API latency, or inefficient rendering.

3. Ensure Button Responsiveness Across Devices

- Fix cases where buttons do not respond to taps or clicks.
- Unresponsive elements lead to task failure and user frustration.

4. Validate Inputs for Email and Shipping Address

- Block invalid email formats (e.g., test..@.com/missing TLD) and incorrect shipping addresses.
- Prevent potential shipping failures and maintain data integrity.
- Add real-time validation and clear error messages.

5. Add Accessibility Features

- Ensure compliance with basic accessibility standards (WCAG), including screen reader support, larger text options, color contrast, and keyboard navigation.
- Accessibility boosts usability and opens the app to a wider audience, including users with visual or motor impairments.

6. Fix Bottom Bar Layout

- Ensure consistent layout and behavior across all devices and resolutions.
- Avoid UI shifts or misaligned icons that confuse users.

7. Improve English Translations and Localization

- Review and correct awkward or incorrect English translations.
- Provide consistent, context-aware language across the UI.

8. Enable Offline Mode or Graceful Degradation

- Allow users to access limited app functionality (product browsing or saved carts) when offline.
- At minimum, show a friendly “no internet” message instead of blocking the app or crashing.

Test Cases

Title	Case ID	Section	Status
Check if "Olive Young" can be installed	C1	App	Passed
Check if "Olive Young" can be deleted, and if so, is all data removed?	C2	App	Passed
Check if "Olive Young" can be reinstalled after delete	C3	App	Passed
Check if "Olive Young" can update itself	C4	App	Failed
Check if the system remembers that "Olive Young" was once installed	C5	App	Passed
Check the speed time it takes for "Olive Young" to be installed	C6	App	Passed
Check the speed time it takes for "Olive Young" to launch	C7	App	Passed
Check if the amount of space "Olive Young" takes up on the device is reasonable	C8	App	Passed
Check if the amount of CPU "Olive Young" takes up on the device while open is reasonable	C9	App	Passed
Check if the battery lose while using "Olive Young" is reasonable	C10	App	Passed
Check how does the app behave while the battery is on 100%	C11	App	Passed
Check how does the app behave while the battery is on 50% and below	C12	App	Passed
Check how does the app behave when connecting or disconnecting the charger from the power supply?	C13	App	Passed
Check how the app behaves when there's no reception	C14	App	Passed
Check how the app behaves when the reception is back on	C15	App	Passed
Verify which kind of app is this (Native or Hybrid)	C16	App	Passed
Check that clicking "Categories" directs the user to a variation of categories	C17	Bottom Bar	Passed
Check that clicking "Search" directs the user to a search bar	C18	Bottom Bar	Passed
Check that clicking "Home" directs the user to the "Home Screen"	C19	Bottom Bar	Passed
Check that clicking "My" directs the user to the login/sign up or their profile area (depends on whether logged in or not)	C20	Bottom Bar	Passed

Check that clicking "History" directs the user to their history view	C21	Bottom Bar	Passed
Check that the "Bottom Bar" remains stable when the user quickly switches between buttons	C22	Bottom Bar	Passed
Check if the "Bottom Bar" remains visible when scrolling down and up on the feed	C23	Bottom Bar	Passed
Ensure the app doesn't crash or lag on repeated taps	C24	Bottom Bar	Passed
Validate no spelling mistakes	C25	Bottom Bar	Passed
Validate that the fonts sizes are big and readable	C26	Bottom Bar	Passed
Validate that the buttons are big enough to click on	C27	Bottom Bar	Passed
Validate that the "Bottom Bar" works with screen rotation	C28	Bottom Bar	Passed
Validate that the buttons under "Bottom Bar" show a click indication when switching between the options	C29	Bottom Bar	Passed
Validate that the button under "Bottom Bar" are consistent when selected and unselected	C30	Bottom Bar	Passed
Check whether the "Bottom Bar" is comfortable to use with one hand	C31	Bottom Bar	Passed
Verify that the "Bottom Bar" area functionality works across supported operating systems (Android/iOS)	C32	Bottom Bar	Passed
Verify that the "Bottom Bar" area functionality works correctly across different resolutions (small phones, tablets)	C33	Bottom Bar	Passed
Check the speed of switching between the options in the "Bottom Bar"	C34	Bottom Bar	Passed
Validate that the color of the font does not blend with the background color	C35	Bottom Bar	Passed
Ensure all buttons are labeled correctly for screen readers (e.g, TalkBack, VoiceOver)	C36	Bottom Bar	Failed
Validate "Bottom Bar" area supports changing colors for people with different disabilities	C37	Bottom Bar	Passed
Validate "Bottom Bar" area supports button size changes for people with different disabilities	C38	Bottom Bar	Passed
Measure the speed time it takes to switch between the buttons in "Bottom Bar"	C39	Bottom Bar	Passed
Ensure that the "Bottom Bar" remains responsive after a few minutes of user inactivity	C40	Bottom Bar	Passed
Verify that clicking "Remove all item(s)" removes all the recently viewed products	C41	History	Passed

Verify that clicking on "X" button closes the "History" section	C42	History	Passed
Verify that clicking outside the area of "History" closes the section	C43	History	Passed
Ensure consistency on Android vs. iOS	C44	History	Passed
Verify that clicking on "Cart" under "My" directs the user to their cart (whether it's empty or not)	C45	My	Passed
Verify that clicking on "Magnifying Glass" icon under "My" directs the user to a search bar	C46	My	Passed
Verify that clicking on "Left Arrow" icon directs the user to the main page	C47	My	Passed
Ensure consistency on Android vs. iOS	C48	My	Passed
Verify that clicking "Join Now" directs to registration	C49	Join Now	Passed
Under "Name" sign with English letters	C50	Join Now	Passed
Under "Name" sign with Hebrew letters	C51	Join Now	Passed
Under "Email ID" sign with a valid email	C52	Join Now	Passed
Under "Password" sign with valid password (8-16 characters)	C53	Join Now	Passed
Under "Age Group" sign with one of the selected ages	C54	Join Now	Passed
Under "Language Preference" sign with one of the selected option	C55	Join Now	Passed
Under "Date of Birth" sign with a valid date	C56	Join Now	Passed
Under "Gender" sign with one of the selected options	C57	Join Now	Passed
Under "Referrer" sign with a valid email	C58	Join Now	Passed
Under "Terms" sign with all the required boxes	C59	Join Now	Passed
Verify that clicking on the "Join Now" button creates an account	C60	Join Now	Passed
Attempt signing up without the required section "Name"	C61	Join Now	Passed
Attempt signing up without the required section "Email ID"	C62	Join Now	Passed

Attempt signing up without the required section "Password"	C63	Join Now	Passed
Attempt signing up without the required section "Age Group"	C64	Join Now	Passed
Attempt signing up without the required boxes under "Terms"	C65	Join Now	Passed
Attempt signing up under "Name" with disallowed special characters	C66	Join Now	Passed
Attempt signing up under "Name" with numbers	C67	Join Now	Passed
Attempt signing up under "Email" with an invalid email	C68	Join Now	Passed
Attempt signing up under "Email" with an email that already exists in the system	C69	Join Now	Passed
Attempt signing up under "Password" with less of the required characters (7 and below)	C70	Join Now	Passed
Validate that there are no spelling mistakes	C71	Join Now	Passed
Validate that the fonts sizes are big and readable	C72	Join Now	Passed
Validate that the fields, buttons, and texts are properly positioned and aligned (Left to Right)	C73	Join Now	Passed
Validate that the fields and buttons are big enough to click on	C74	Join Now	Passed
Verify that the "Join Now" area works with screen rotation	C75	Join Now	Passed
Verify that after creating an account, the layout of the app stays consistent	C76	Join Now	Passed
Validate that the button "Join Now" shows a click indication	C77	Join Now	Passed
Validate that input errors are clearly shown and user-friendly	C78	Join Now	Passed
Verify that performing any valid swipe goes smoothly without lagging	C79	Join Now	Passed
Verify that the "Join Now" area functionality works across supported operating systems (Android/iOS)	C80	Join Now	Passed
Verify that the "Join Now" area functionality works correctly across different resolutions (small phones, tablets)	C81	Join Now	Passed
Confirm data isn't lost when interrupted by a phone call	C82	Join Now	Passed
Test how the app handles push notifications	C83	Join Now	Passed
Measure how fast the app responds upon submission	C84	Join Now	Passed
Ensure password characters are masked during entry	C85	Join Now	Passed

Confirm sensitive data isn't stored locally after sign-up	C86	Join Now	Failed
Validate that the color of the field headings does not blend with the background color	C87	Join Now	Passed
Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	C88	Join Now	Failed
Validate that the "Join Now" area supports changing page colors for people with different disabilities	C89	Join Now	Passed
Validate that the "Join Now" area supports font size changes for people with different disabilities	C90	Join Now	Passed
Simulate 100 users creating an account at once	C91	Join Now	Failed
Verify that the user can log in with correct email and password	C92	Sign In	Passed
Verify that the field "Save ID" is clickable and saves the information	C93	Sign In	Passed
Verify that the field "Keep me signed in" is clickable and keeps the users signed in next time they enter the app	C94	Sign In	Passed
Verify that the button "Sign In with Google" directs the user to their Google account	C95	Sign In	Passed
Verify that the button "Sign in with Apple" directs the user to their Apple Account	C96	Sign In	Passed
Verify that the button "Sign In" signs in the user and directs him to his account	C97	Sign In	Passed
Verify that the user can't login with incorrect credentials, and an error is shown	C98	Sign In	Passed
Verify that the user can't login with blank fields, and an error is shown	C99	Sign In	Passed
Verify that the user can't sign in with non-existent account	C100	Sign In	Passed
Validate that there are no spelling mistakes	C101	Sign In	Passed
Validate that the fonts sizes are big and readable	C102	Sign In	Passed
Validate that the fields, buttons, and texts are properly positioned and aligned (Left to Right)	C103	Sign In	Passed
Validate that the fields and buttons are big enough to click on	C104	Sign In	Passed
Verify that the "Sign In" area works with screen rotation	C105	Sign In	Failed
Validate that the button "Sign In" shows a click indication	C106	Sign In	Failed
Validate that input errors are clearly shown and user-friendly	C107	Sign In	Passed

Verify performing any valid swipe goes smoothly without lagging	C108	Sign In	Passed
Verify that the "Sign In" area functionality works across supported operating systems (Android/iOS)	C109	Sign In	Passed
Verify that the "Sign In" area functionality works correctly across different resolutions (small phones, tablets)	C110	Sign In	Passed
Confirm data isn't lost when interrupted by a phone call	C111	Sign In	Passed
Test how the app handles push notifications	C112	Sign In	Passed
Verify that the users can sign in with their Google account	C113	Sign In	Passed
Verify that the users can sign in with their Apple account	C114	Sign In	Passed
Measure how fast the app responds upon submission	C115	Sign In	Passed
Ensure password characters are masked during entry	C116	Sign In	Passed
Validate that the color of the field headings does not blend with the background color	C117	Sign In	Passed
Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	C118	Sign In	Failed
Validate that the "Sign In" area supports changing page colors for people with different disabilities	C119	Sign In	Passed
Validate that the "Sign In" area supports font size changes for people with different disabilities	C120	Sign In	Passed
Simulate 100 users signing in their account at once	C121	Sign In	Failed
Verify that the button "Forgot Your Password?" directs the user to a password reset area	C122	Forgot your Password ?	Passed
Check that under "Name" and "Last Name" the user can apply a name that already exists under an email	C123	Forgot your Password ?	Passed
Check that under "Email Address" the user can apply an existing email in the system	C124	Forgot your Password ?	Passed

Check that the button "Cancel" directs the user back to "My" area (login/sign in)	C125	Forgot your	Passed
Check that the button "Continue" after completing the form directs the user to the following step	C126	Forgot your	Passed
Check that the button "Customer Service" directs the user to a following step	C127	Forgot your	Passed
Ensure the system allows users to request a reset link with a valid email	C128	Forgot your	Passed
Ensure reset link in the email redirects to a secure reset form	C129	Forgot your	Passed
Allow users to reset password successfully	C130	Forgot your	Passed
Check that the user can't reset a password with a unregistered email	C131	Forgot your	Passed
Verify that the user can't reset a password with a blank email field, and an error is shown	C132	Forgot your	Passed
Verify that the user can't reset a password with badly formatted email (..com,missing @, missing domain), and an error is shown	C133	Forgot your Password ?	Passed
Verify that the user can't reset a password with an expired reset link	C134	Forgot your	Passed
Validate no spelling mistakes	C135	Forgot your	Passed
Validate that the fonts sizes are big and readable	C136	Forgot your	Passed
Validate that the fields, buttons, and texts are properly positioned and aligned (Left to Right)	C137	Forgot your	Passed
Validate that the fields and buttons are big enough to click on	C138	Forgot your	Passed
Validate that "Forgot Your Password" area works with screen rotation	C139	Forgot your	Passed
Validate that the buttons show a click indication	C140	Forgot your	Passed
Ensure users understand what to do	C141	Forgot your	Passed
Validate user is notified clearly that an email was sent	C142	Forgot your	Passed
Validate that input errors are clearly shown and user-friendly	C143	Forgot your	Passed
Verify performing any valid swipe goes smoothly without lagging	C144	Forgot your	Passed
Verify that the "Forgot Your Password" area functionality works across supported operating systems (Android/iOS)	C145	Forgot your	Passed

Verify that the "Forgot Your Password" area functionality works across different resolutions (smal phones, tablets)	C146	Forgot your Password?	Passed
Confirm data isn't lost when interrupted by a phone call	C147	Forgot your	Passed
Test how the app handles push notifications	C148	Forgot your	Passed
Measure how fast the app responds upon submission	C149	Forgot your	Passed
Verify how fast reset email is sent after tapping "Send"	C150	Forgot your	Passed
Ensure the new password characters are masked during entry	C151	Forgot your	Passed
Check that the reset link expire after use	C152	Forgot your	Passed
Check that the new password must follows security rules (boundary test - length, special chars)	C153	Forgot your	Passed
Check that the password are never visible in Network Logs	C154	Forgot your	Failed
Validate that the colors of the fields heaings does not blend with the background color	C155	Forgot your	Passed
Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	C156	Forgot your	Failed
Validate "Forgot Your Password" area supports changing page colors for people with different disabilities	C157	Forgot your	Passed
Validate "Forgot Your Password" area supports font size changes for people with different disabilities	C158	Forgot your	Passed
Ensure user can create an account	C159	My Account	Passed
Ensure user can access and view their profile details	C160	My Account	Passed
Allow user to update name, phone number, etc	C161	My Account	Passed
Ensure user can delete their account	C162	My Account	Passed
Ensure user can log out from their account	C163	My Account	Passed
Verify that the user can access and track their past orders	C164	My Account	Passed
Validate that clicking "Coupons" directs the user to the available coupons and that they're usable	C165	My Account	Passed
Validate that the user can register coupons manually	C166	My Account	Passed
Validate that the user can view their past reviews on products	C167	My Account	Passed
Validate that the user can view their account level status	C168	My Account	Passed

Validate that the user can access their "Reward Points"	C169	My Account	Passed
Validate that the user can access their "Cancellation History"	C170	My Account	Passed
Validate that the user can access the "Cart" from "My Account" area	C171	My Account	Passed
Validate that the user can access their "Wish List"	C172	My Account	Passed
Ensure invalid formats are rejected while updating details	C173	My Account	Passed
Ensure the user can't update their information with blank mandatory fields	C174	My Account	Passed
Validate no spelling mistakes	C175	My Account	Passed
Ensure all user details are labeled, visible, and aligned	C176	My Account	Passed
Ensure users can easily return to the main page from My Account (Back/Home buttons)	C177	My Account	Passed
Confirm actions like "Logout" or "Delete Account" prompt for user confirmation	C178	My Account	Passed
Verify "My Account" area works with screen rotation	C179	My Account	Passed
Verify performing any valid swipe goes smoothly without lagging	C180	My Account	Passed
Verify "My Account" functionality works across supported operating systems (Android/iOS)	C181	My Account	Passed
Verify "My Account" functionality works across different resolutions (small phones, tablets)	C182	My Account	Passed
Measure how fast the section loads	C183	My Account	Passed
Ensure changes to account details are reflected immediately or with minimal delay	C184	My Account	Passed
Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	C185	My Account	Failed
Validate that the colors of the fields headings does not blend with the background color	C186	My Account	Passed
Validate that the "My Account" area supports changing page colors for people with different disabilities	C187	My Account	Passed
Validate "My Account" area supports font size changes for people with different disabilities	C188	My Account	Passed
Simulate 100 users updating their profile data at once	C189	My Account	Failed

Ensure consistency on Android vs. iOS	C190	Home	Passed
Ensure the user can search in the bar a valid product	C191	Search	Passed
Verify that the system provides relevant and valid search results when the user enters a product or keyword	C192	Search	Passed
Ensure the user can slide between "Popular searches" to "Recent searches"	C193	Search	Passed
Ensure consistency on Android vs. iOS	C194	Search	Passed
Ensure consistency on Android vs. iOS	C195	Categories	Passed
Ensure that clicking on the "Hamburger" icon directs the user to a variation of categories	C196	Hamburger	Passed
Ensure the name of the user's account is shown after clicking on the "Hamburger" icon (after Login/Sign In)	C197	Hamburger	Passed
Ensure that clicking "Join Now" under "Hamburger" icon directs the user to register (in case they are not connected)	C198	Hamburger	Passed
Ensure that clicking "Sign In" under "Hamburger" icon directs the user to sign in (in case they are not connected)	C199	Hamburger	Passed
Verify that the user can access their account from the "Hamburger" icon (after Login/Sign In)	C200	Hamburger	Passed
Ensure that clicking on the "Gear Wheel" under the "Hamburger" icon directs the user to the settings	C201	Hamburger	Passed
Verify that the user can change the Country and Currency settings under the "Hamburger" icon	C202	Hamburger	Passed
Verify that the user can change the app Language under the "Hamburger" icon	C203	Hamburger	Passed
Verify that the user can access Customer Service under the "Hamburger" icon	C204	Hamburger	Passed
Verify that the user can Sign Out of their account under the "Hamburger" icon	C205	Hamburger	Passed
Verify that the user can Track Orders under the "Hamburger" icon	C206	Hamburger	Passed
Verify that clicking on "Brands" under the "Hamburger" icon directs the user to the brands around the app	C207	Hamburger	Passed
Verify that clicking on "Best" under the "Hamburger" icon directs the user to the best sellers around the app	C208	Hamburger	Passed
Verify that clicking on "New" under the "Hamburger" icon directs the user to the new products around the app	C209	Hamburger	Passed
Verify that clicking on "Sale" under the "Hamburger" icon directs the user to the products that are on sale around the app	C210	Hamburger	Passed

Verify that clicking on "Events" under the "Hamburger" icon directs the user to the events around the app	C211	Hamburger	Passed
Verify that clicking on "Membership" under the "Hamburger" icon directs the user to the membership at the "Top Strip"	C212	Hamburger	Passed
Verify that clicking on "Skincare" under the "Hamburger" icon lets the user access and view all skin care products categories	C213	Hamburger	Passed
Verify that clicking on "Makeup" under the "Hamburger" icon lets the user access and view all makeup products categories	C214	Hamburger	Passed
Verify that clicking on "Bath & Body" under the "Hamburger" icon lets the user access and view all bath and body products categories	C215	Hamburger	Passed
Verify that clicking on "Hair" under the "Hamburger" icon lets the user access and view all hair products categories	C216	Hamburger	Passed
Verify that clicking on "Face Masks" under the "Hamburger" icon lets the user access and view all face masks products categories	C217	Hamburger	Passed
Verify that clicking on "Suncare" under the "Hamburger" icon lets the user access and view all suncare products categories	C218	Hamburger	Passed
Verify that clicking on "K-Pop" under the "Hamburger" icon lets the user access and view all K-Pop products categories	C219	Hamburger	Passed
Verify that clicking on "Makeup Brush & Tools" under the "Hamburger" icon lets the user access and view makeup tools products categories	C220	Hamburger	Passed
Verify that clicking on "Accessories" under the "Hamburger" icon lets the user access and view all accessories products categories	C221	Hamburger	Passed
Verify that clicking on "Wellness" under the "Hamburger" icon lets the user access and view all wellness products categories	C222	Hamburger	Passed
Verify that clicking on "Men's Care" under the "Hamburger" icon lets the user access and view all men's care products categories	C223	Hamburger	Passed
Verify that clicking on "Supplements" under the "Hamburger" icon lets the user access and view all supplements products categories	C224	Hamburger	Passed
Verify that clicking on "Food & Drink" under the "Hamburger" icon lets the user access and view all food & drink products categories	C225	Hamburger	Passed
Verify that clicking on "Special Value Sets" under the "Hamburger" icon lets the user access and view packages products categories	C226	Hamburger	Passed
Validate that all the categories under "Hamburger" icon are consistent by functionality	C227	Hamburger	Passed
Ensure the user can return from category to the main list without confusion while clicking back arrow	C228	Hamburger	Passed
Test system response when a category is empty ("No products found in this category" is shown?)	C229	Hamburger	Passed
Test the system response when repeatedly switching between categories	C230	Hamburger	Passed

Validate no spelling mistakes	C231	Hamburger	Passed
Ensure category items are visually aligned and not cut off	C232	Hamburger	Passed
Check that the categories are logically grouped and named	C233	Hamburger	Passed
Validate that the fields and buttons are big enough to click on	C234	Hamburger	Passed
Validate the buttons show a click indication	C235	Hamburger	Passed
Validate performing any valid swipe goes smoothly without lagging	C236	Hamburger	Passed
Verify functionality works across supported operating systems (Android/iOS)	C237	Hamburger	Passed
Verify functionality works across different resolutions (small phones, tablets)	C238	Hamburger	Passed
Measure how quickly the category screen loads	C239	Hamburger	Passed
Ensure all titles are labeled correctly for screen readers (e.g.,TalkBack, VoiceOver)	C240	Hamburger	Failed
Validate the area supports changing page colors for people with different disabilities	C241	Hamburger	Passed
Validate the area supports font size changes for people with different disabilities	C242	Hamburger	Passed
Ensure the home screen is the default view after launching the app	C243	Home Screen	Passed
Validate banner taps redirect users to the correct promotional or product page	C244	Home Screen	Passed
Tapping the "Home" button in the "Bottom Bar" brings the user back to the top of the "Home Screen"	C245	Home Screen	Passed
Ensure there's a Footer	C246	Home Screen	Passed
Ensure app handles no internet gracefully	C247	Home Screen	Passed
Validate no spelling mistakes	C248	Home Screen	Passed
Validate that the fonts sizes are big and readable	C249	Home Screen	Passed
Ensure all fonts of the titles and labels are consistent	C250	Home Screen	Passed

Validate that the fields, buttons, images, and texts are positioned correctly (Left to Right)	C251	Home Screen	Passed
Validate that the buttons are big enough to click on	C252	Home Screen	Passed
Ensure the user can scroll through the home feed without lag or stutter	C253	Home Screen	Passed
Verify the "Home Screen" area works with screen rotation	C254	Home Screen	Passed
Verify "Home Screen" functionality works across supported operating systems (Android, iOS)	C255	Home Screen	Passed
Ensure layout, icons, and interactions behave the same across platforms	C256	Home Screen	Passed
Verify "Home Screen" functionality works across different resolutions (small phones, tablets)	C257	Home Screen	Passed
Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	C258	Home Screen	Failed
Validate "Home Screen" area supports chaning page colors for people with different disabilities	C259	Home Screen	Passed
Validate "Home Screen" area supports font size changes for people with different disabilities	C260	Home Screen	Passed
Check if "Olive Young" identifys the user's location	C261	Home Screen	Passed
Check if "Olive Young" identifys the user's currency and changes it according to their location (USD, NIS)	C262	Home Screen	Passed
Check if the "Olive Young" identifys the user's language and translating the app according to their location	C263	Home Screen	Failed
Measure how quickly the home screen loads after app launch	C264	Home Screen	Passed
Test how fast banners and product images appear after opening home	C265	Home Screen	Passed
Check how the app behaves when simulating 1000+ users accessing the home simultaneously	C266	Home Screen	Failed
Check how the app behaves when scrolling continuously for 2-3 minutes through the home feed	C267	Home Screen	Passed
Ensure the top strip appears on all main screens	C268	Top Strip	Passed
Verify that clicking on "Best" in the "Top Strip" directs the user to the best sellers around the app	C269	Top Strip	Passed
Verify that clicking on "New" in the "Top Strip" directs the user to the new products around the app	C270	Top Strip	Passed
Verify that clicking on "Sale" in the "Top Strip" directs the user to the products that are on sale around the app	C271	Top Strip	Passed

Verify that clicking on "K-Pop" in the "Top Strip" directs the user to the K-Pop products around the app	C272	Top Strip	Passed
Verify that clicking on "Events"" in the "Top Strip"" directs the user to the events around the app	C273	Top Strip	Passed
Verify that clicking on "Membership" in the "Top Strip" directs the user to the membership screen	C274	Top Strip	Passed
Check the behavior of the app by tapping quickly between buttons (does it crash?)	C275	Top Strip	Passed
Validate that the buttons are big enough to click on	C276	Top Strip	Passed
Validate that the font sizes are big and readable	C277	Top Strip	Passed
Check if the buttons give visual feedback when tapped (ripple, highlight, animation)	C278	Top Strip	Passed
Verify "Top Strip" functionality works across supported operating systems (Android/iOS)	C279	Top Strip	Passed
Verify "Top Strip" functionality works across different resolutions (small phones, tablets)	C280	Top Strip	Passed
Ensure the user can swipe through the "Top Strip" without lag or stutter	C281	Top Strip	Passed
Measure how quickly the categories screen load	C282	Top Strip	Passed
Ensure "Search" button appears on all main screens	C283	Search	Passed
Ensure the user can search in the bar a valid product	C284	Search	Passed
Verify that the system provides relevant and valid search results when the user enters a product or keyword	C285	Search	Passed
Ensure the user can slide between "Popular searches" to "Recent searches"	C286	Search	Passed
Ensure consistency on Android vs. iOS	C287	Search	Passed
Ensure that clicking on the "Cart" icon directs the user to their cart	C288	Cart & Coupons	Passed
Ensure the user can change their shipping to other countries under "Cart"	C289	Cart & Coupons	Passed
Ensure that tapping "Add to Cart" adds the product	C290	Cart & Coupons	Passed
Ensure the user can read all cart items load with correct info	C291	Cart & Coupons	Passed
Check if quantity can be increased or decreased	C292	Cart & Coupons	Passed

Check if updates are saved and reflected immediately accordingly to a quantity change	C293	Cart & Coupons	Passed
Check that when a product is added to the "Cart" – the number of items is updated in the cart icon and the number	C294	Cart & Coupons	Passed
Ensure user can remove items from "Cart"	C295	Cart & Coupons	Passed
Ensure the cart shows a placeholder or message when empty	C296	Cart & Coupons	Passed
Ensure that the user can apply a promo code by clicking on the button "Apply"	C297	Cart & Coupons	Passed
Ensure that the user use valid coupons	C298	Cart & Coupons	Passed
Ensure that the user can apply all the coupons available at once by selecting the field "Maximum Benefits Applied"	C299	Cart & Coupons	Passed
Ensure that the user can choose between the different available coupons	C300	Cart & Coupons	Passed
Ensure the system calculates and shows the right final price after using any coupons	C301	Cart & Coupons	Passed
Ensure the user can see the final price before proceeding to "Checkout"	C302	Cart & Coupons	Passed
Ensure the user can view the order preview before proceeding to "Checkout"	C303	Cart & Coupons	Passed
Ensure the user can see the supported payment methods	C304	Cart & Coupons	Passed
Ensure that the button "Continue Shopping" under "Cart" directs the user to the "Main Page"	C305	Cart & Coupons	Passed
Ensure that the button "Proceed to Checkout" directs the user to "Checkout"	C306	Cart & Coupons	Passed
Check if the user can apply an expired or invalid Coupon	C307	Cart & Coupons	Failed
Check if the user can apply an invalid Promo Code	C308	Cart & Coupons	Failed
Check if the user can remove an item during network failure	C309	Cart & Coupons	Passed
Set invalid quantity to 1,000	C310	Cart & Coupons	Passed
Check that when increasing or decreasing the quantity of the product in the cart with a quick double click, the quantity	C311	Cart & Coupons	Passed
Check if the product image, title, price, and quantity controls are visible and aligned	C312	Cart & Coupons	Passed
Check how does the system behaves when removing a product (ask "Are you sure?" before removing)	C313	Cart & Coupons	Passed

Check if the buttons give visual feedback when tapped (ripple, highlight, animation)	C314	Cart & Coupons	Passed
Check if clicking on the title/image of the product directs the user to the product screen	C315	Cart & Coupons	Passed
Check when applying invalid quantity, the system shows an error notification	C316	Cart & Coupons	Passed
Verify "Cart" functionality and UI works across supported operating systems (Android/iOS)	C317	Cart & Coupons	Passed
Verify "Cart" functionality works across different resolutions (small phones, tablets)	C318	Cart & Coupons	Passed
Check the speed time it takes for "Cart" to load	C319	Cart & Coupons	Passed
Check the speed time it takes to update the cart by quantity change	C320	Cart & Coupons	Passed
Validate that the color of the field headings does not blend with the background color	C321	Cart & Coupons	Passed
Validate that the user can apply a valid shipping address (country)	C322	Checkout	Passed
Validate that the user can apply a valid name in English letters	C323	Checkout	Passed
Validate that the user can apply a valid name in Hebrew letters	C324	Checkout	Passed
Validate that the user can apply a valid Street address according to their chosen country	C325	Checkout	Passed
Validate that the user can apply a valid City/Town according to their chosen country	C326	Checkout	Passed
Validate that the user can apply a valid Region according to their chosen country	C327	Checkout	Passed
Validate that the user can apply a valid Zip Code	C328	Checkout	Passed
Verify that the system provides relevant and valid Address and Location results when the user enters a keyword	C329	Checkout	Passed
Check by marking the field "Make this my deafult address" does indeed saves it as main address	C330	Checkout	Passed
Validate that the user can apply a valid Mobile Number	C331	Checkout	Passed
Validate that the user can apply a valid email address/change the current one	C332	Checkout	Passed
Validate that the user can use Points and update the total price accordingly	C333	Checkout	Passed
Ensure the user can remove Points and update the total price accordingly	C334	Checkout	Passed

Validate the user can purchase the order through a valid Paypal account	C335	Checkout	Passed
Validate the user can purchase the order with a valid Credit/Debit Card	C336	Checkout	Passed
Validate the user can purchase the order through a valid UnionPay account	C337	Checkout	Failed
Check by marking the field "Save Payment Preference" does indeed saves the payment information	C338	Checkout	Passed
Check by marking the field "Agree to All" the user agrees to the terms and the button "Place Order" is available	C339	Checkout	Passed
Ensure the "Place Order" button finalizes the purchase	C340	Checkout	Passed
Check if an order summary and ID displayed with confirmation email sent	C341	Checkout	Passed
Check the speed time it take for "Checkout" to load	C342	Checkout	Passed
Ensure the user can't enter an invalid Name with special characters	C343	Checkout	Passed
Ensure the user can't enter an invalid Name with numbers	C344	Checkout	Passed
Ensure the user cant enter an invalid address according to their chosen country (street, city, region and zip code)	C345	Checkout	Passed
Ensure the user can't enter an invalid Mobile Number	C346	Checkout	Passed
Ensure the user can't enter an invalid Email Address	C347	Checkout	Passed
Ensure the user can't enter and purchase with an invalid Paypal account information	C348	Checkout	Passed
Ensure the user can't enter and purchase with an invalid Credit Card	C349	Checkout	Passed
Ensure the user can't enter and purchase with an invalid UnionPay account information	C350	Checkout	Failed
Ensure the user can't proceed and place an order with empty required fields and a message is shown ("____ is required")	C351	Checkout	Passed
Validate that the user can return from "Checkout" to the "Cart" without confusion while clicking back arrow	C352	Checkout	Passed
Validate the user can view the products on the same screen before clickling "Place Order"	C353	Checkout	Passed
Verify all input fields and buttons are well-aligned and clearly labeled	C354	Checkout	Passed
Check if the buttons give visual feedback when tapped (ripple, highlight, animation)	C355	Checkout	Passed

Ensure the user can view the Order Summary before placing an order	C356	Checkout	Passed
Check if the "Checkout" proceeds goes smoothly, easy to learn for the user (Cart - Address - Payment - Confirmation)	C357	Checkout	Passed
Check when clicking the “Place Order” button requires explicit confirmation	C358	Checkout	Passed
Check if the user leaves and returns to the screen, the inputs is still preserved	C359	Checkout	Passed
Verify "Checkout" functionality works across supported operating systems (Android,iOS)	C360	Checkout	Passed
Verify "Checkout" functionality works across different resolutions (small phones, tablets)	C361	Checkout	Passed
Check if the system prevents duplicate orders by disabling double taps on "Place Order"	C362	Checkout	Passed
Check if there's session times out, and the user is redirected back to "Cart" before proceeding	C363	Checkout	Passed
Confirm Data isn't lost when interrupted by a phone call	C364	Checkout	Passed
Test how the app handles push notifications	C365	Checkout	Passed
Validate that the color of the field headings does not blend with the background color	C366	Checkout	Passed
Measure how fast the "Checkout" loads	C367	Checkout	Passed
Measure how fast it takes to receive a confirmation and place an order	C368	Checkout	Passed
Try to Simulate 1,000 concurrent checkouts	C369	Checkout	Failed
Check how system behaves after multiple orders from same user in short time	C370	Checkout	Failed

<input type="checkbox"/> T374	Ensure the user can remove Points and update the total price accordingly	Passed
<input type="checkbox"/> T330	Validate the user can purchase the order through a valid Paypal account	Passed
<input type="checkbox"/> T331	Validate the user can purchase the order with a valid Credit/Debit Card	Passed
<input type="checkbox"/> T332	Validate the user can purchase the order through a valid UnionPay account	Failed
<input type="checkbox"/> T333	Check by marking the field "Save Payment Preference" does indeed saves the payment information	Passed
<input type="checkbox"/> T334	Check by marking the field "Agree to All" the user agrees to the terms and the button "Place Order" is available	Passed
<input type="checkbox"/> T335	Ensure the "Place Order" button finalizes the purchase	Passed
<input type="checkbox"/> T336	Check if an order summary and ID displayed with confirmation email sent	Passed
<input type="checkbox"/> T317	Check the speed time it take for "Checkout" to load	Passed
<input type="checkbox"/> T337	Ensure the user can't enter an invalid Name with special characters	Passed
<input type="checkbox"/> T338	Ensure the user can't enter an invalid Name with numbers	Passed
<input type="checkbox"/> T339	Ensure the user can't enter an invalid address according to their chosen country (street, city, region and zip code)	Passed
<input type="checkbox"/> T340	Ensure the user can't enter an invalid Mobile Number	Passed
<input type="checkbox"/> T341	Ensure the user can't enter an invalid Email Address	Passed
<input type="checkbox"/> T342	Ensure the user can't enter and purchase with an invalid Paypal account information	Passed
<input type="checkbox"/> T343	Ensure the user can't enter and purchase with an invalid Credit Card	Passed
<input type="checkbox"/> T344	Ensure the user can't enter and purchase with an invalid UnionPay account information	Failed
<input type="checkbox"/> T345	Ensure the user can't proceed and place an order with empty required fields and a message is shown ("_____ is required")	Passed
<input type="checkbox"/> T347	Validate that the user can return from "Checkout" to the "Cart" without confusion while clicking back arrow	Passed
<input type="checkbox"/> T348	Validate the user can view the products on the same screen before clicking "Place Order"	Passed
<input type="checkbox"/> T349	Verify all input fields and buttons are well-aligned and clearly labeled	Passed
<input type="checkbox"/> T350	Check if the buttons give visual feedback when tapped (ripple, highlight, animation)	Passed
<input type="checkbox"/> T351	Ensure the user can view the Order Summary before placing an order	Passed
<input type="checkbox"/> T352	Check if the "Checkout" proceeds goes smoothly, easy to learn for the user (Cart - Address - Payment - Confirmation)	Passed
<input type="checkbox"/> T353	Check when clicking the "Place Order" button requires explicit confirmation	Passed
<input type="checkbox"/> T354	Check if the user leaves and returns to the screen, the inputs is still preserved	Passed
<input type="checkbox"/> T355	Verify "Checkout" functionality works across supported operating systems (Android,iOS)	Passed
<input type="checkbox"/> T356	Verify "Checkout" functionality works across different resolutions (small phones, tablets)	Passed
<input type="checkbox"/> T363	Check if the system prevents duplicate orders by disabling double taps on "Place Order"	Passed
<input type="checkbox"/> T364	Check if there's session times out, and the user is redirected back to "Cart" before proceeding	Passed
<input type="checkbox"/> T357	Confirm Data isn't lost when interrupted by a phone call	Passed
<input type="checkbox"/> T358	Test how the app handles push notifications	Passed
<input type="checkbox"/> T360	Validate that the color of the field headings does not blend with the background color	Passed
<input type="checkbox"/> T359	Measure how fast the "Checkout" loads	Passed
<input type="checkbox"/> T362	Measure how fast it takes to receive a confirmation and place an order	Passed
<input type="checkbox"/> T365	Try to Simulate 1,000 concurrent checkouts	Failed
<input type="checkbox"/> T366	Check how system behaves after multiple orders from same user in short time	Failed

Jira Reports

[OY-1] [The App blocks the user from using it and freezes when the reception is down](#) Created: 20/Jun/25 Updated: 24/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	<p>Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers</p>		

Attachments:**Severity:****Critical****Description****Steps to Reproduce**

- Step 1. Open the app “Olive Young”
- Step 1. Switch the settings on the phone to “Airplane Mode” or go to a place with no reception
- Step 2. Go back to “Olive Young” once again

Actual Result

A blocking error notification pops up: “A network error occurred,” and the app freezes.

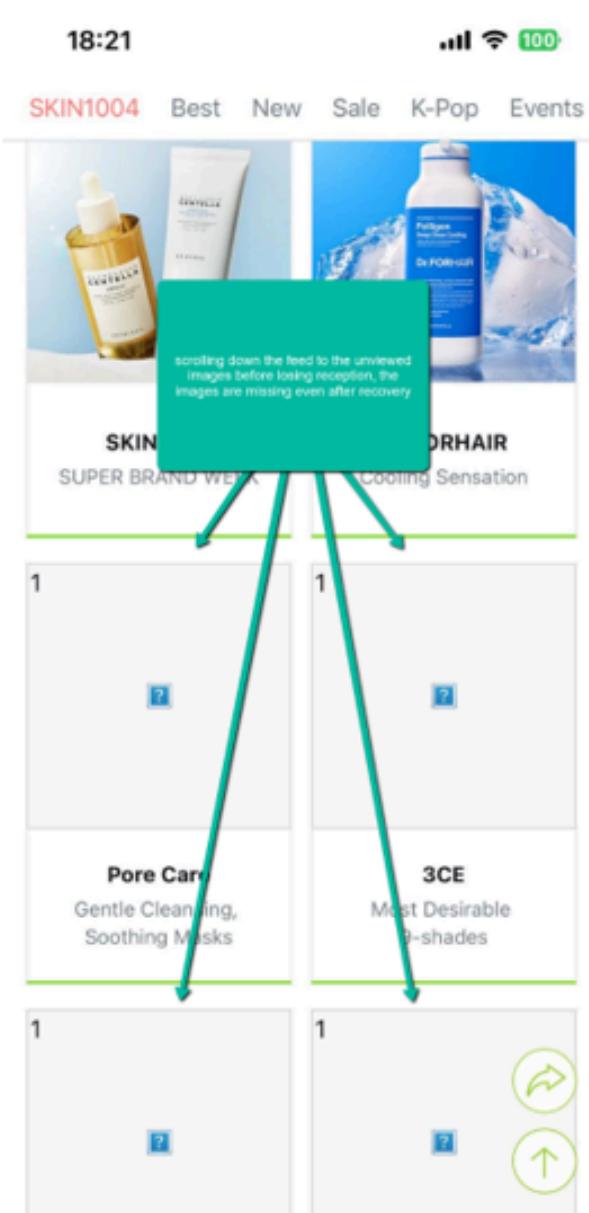

Expected Result

The App will indeed pop up an error notification, but **will not** freeze and prevent the user from proceeding at least to “view” and scroll through the loaded content.
The user should at least use an “Offline Mode”.

[OY-2] After reception is back on, the unseen images on the rest of the feed stay blocked Created: 20/Jun/25 Updated: 20/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	<p>Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers</p>		

Attachments:**Description****Steps to Reproduce**

- Step 1. Open the app “Olive Young”
- Step 2. Switch the settings on the phone to “Flying Mode” or go to a place with no reception
- Step 2. Go back to “Olive Young” once again
- Step 4. Scroll down to the images that have not been viewed yet

Actual Result

The images and banners that have not been viewed before the reception went down stay “blocked” and do not load after recovery.

Only after closing the app and loading it back up - the missing images are visible.

Expected Result

The images and banners would load correctly after recovery.

[OY-3] [The Bottom Bar disappears when scrolling down the feed](#) Created:

Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Major
-----------	-------

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Click on “My” section at the “Bottom Bar”
- Step 3. Switch back to the “Home” section at the “Bottom Bar”

Actual Result

There's a loading icon spinning on screen on each section, and it takes around 2-3 seconds to load to selected screen.

Expected Result

Switching between the options at the “Bottom Bar” should be smooth and quick, nearly up to one second only.

[OY-5] [Olive Young doesn't include Accessibility features for people with different disabilities](#)

Created: 20/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	High
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None

Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Critical
-----------	----------

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Search for the help feature “Accessibility”

Actual Result

There's no accessibility feature in this app.

Expected Result

As an app with a huge variety of different products, there should be an accessibility feature for people with disabilities who can't read properly, hear or have motor abilities.

[OY-6] [The Bottom Bar has poor translation at the "My" section](#) Created: 20/Jun/25 Updated: 21/Jun/25

Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Attachments:	<h2>Best Sellers in USA</h2>  <p>This section wasn't translated right to English. It should be either "Me" or "My Account"</p>		
Severity:	Moderate		

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Look at the section “My” at the Bottom Bar

Actual Result

The user's section is translated as “My”.

Expected Result

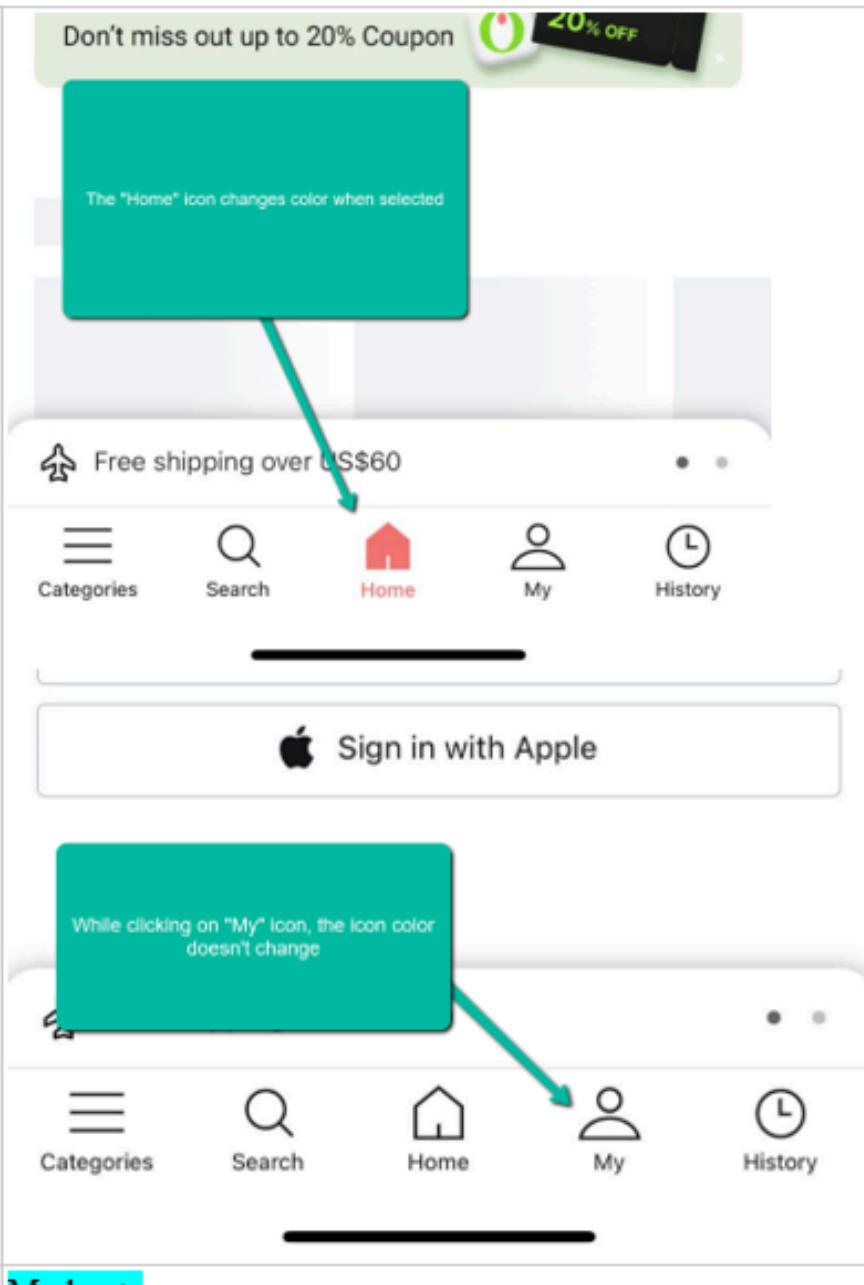

The user's section should be translated as “Me” or “My Account”, as it may sound confusing otherwise.

[OY-7] While switching between options at the Bottom Bar, there's color indication only at the "Home" icon most of the times

Created: 20/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium

Password *	<input type="password"/> ······
Age Group *	<input type="text"/> 20s
Severity:	Critical

The system approves this invalid email.
Two consecutive dots in the local part are not allowed!

Also tried:
.sophia.mendez@gmail.com
sophia.mendez@gmail.com
sophiamendez@gmail.co

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Click on “My” section at the “Bottom Bar”
- Step 3. Click on “Join Now”
- Step 4. Fill the required fields
- Step 5. At the “Email Address”, fill in the following invalid email:
sophia..mendez@gmail.com
- Step 6. Click “Join Now”

Actual Result

The system approves this form with an invalid email.

Expected Result

An error notification will pop up: “The email address you have entered is not available”.

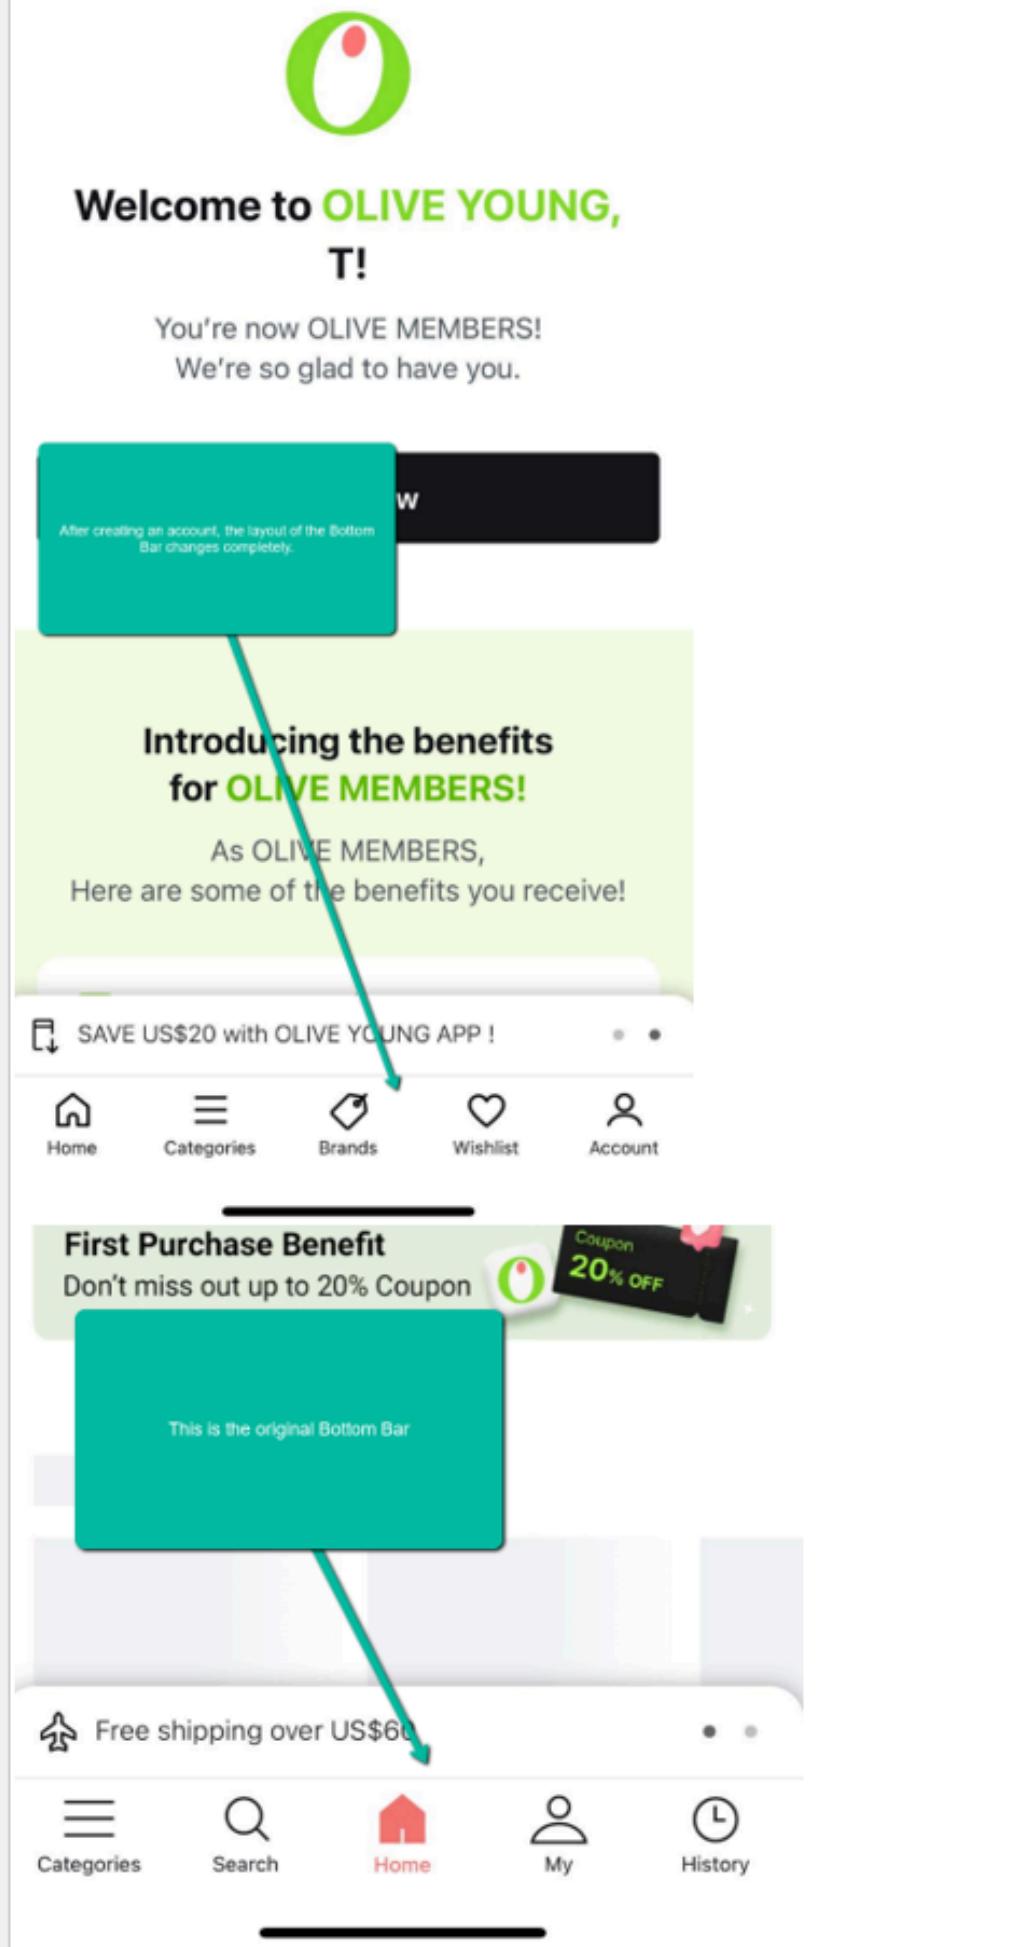

[OY-9] After creating an account, the Bottom Bar changes its layout and titles

Created: 20/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Attachments:		Sign In		
 <p>The screenshot shows a mobile sign-in form for Olive Young. It includes fields for email (nathen.blake@gmail.com) and password, and checkboxes for 'Save ID' and 'Keep me signed in'. A teal callout box highlights the 'Forgot your password?' link at the bottom of the page. A red arrow points from the top-left of the callout box to the 'Forgot your password?' link.</p>				
<p>Enjoy exclusive services and perks from OLIVE YOUNG</p>				
Severity:	Moderate			

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Click on “My” section at the “Bottom Bar”
- Step 3. Watch button “Forgot your password?”

Actual Result

The title of the button is too bright, it almost blends with the background color, especially when using a mobile app.

Expected Result

All the titles in this app should be darker compared to the background color, so the user could see things clearly and not have a hard time using the app.

[OY-11] When trying to reset a password, the system allows to apply invalid registered emails Created: 21/Jun/25 Updated: 21/Jun/25

Severity:	Critical

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Click on “My” at the “Bottom Bar”
- Step 3. Under “Sign In” click on the button “Forgot your password?”
- Step 4. Apply the correct name of the existing invalid email
- Step 5. Apply the invalid email of the existing account: “[sophia..mendez@gmail.com](#)”

Actual Result

A confirmation notification pops up: “Email sent successfully. Please check the email inbox.”

Expected Result

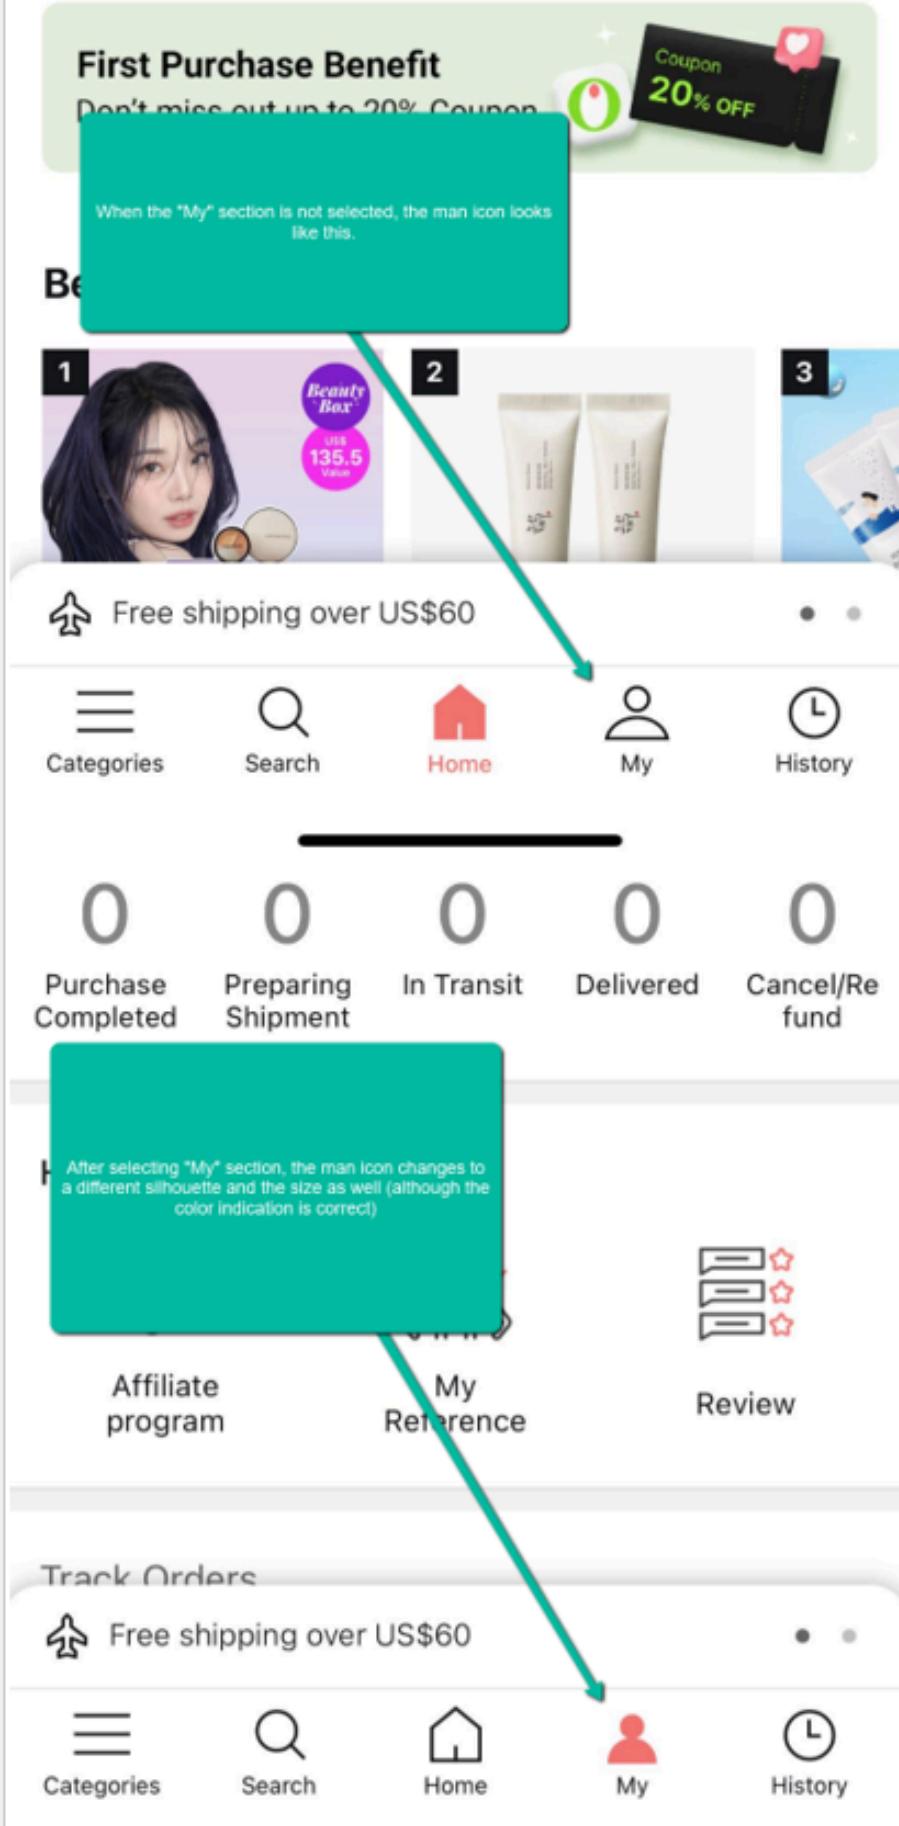

The system will pop up an error notification: “This email is invalid, please provide the correct input” and prevent the user from proceeding.

[OY-12] When clicking "My" at the "Bottom Bar", then switching to another button, the man's silhouette icon changes (not color wise) Created: 21/Jun/25 Updated:

21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None

Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Attachments:	 <p>Hi, there! ></p> <p>Brands</p> <p>Best</p> <p>New</p> <p>Sale</p> <p>Events</p> <p>Membership</p>
Severity:	Low

Description

Steps to Reproduce

Step 1. Open the app “Olive Young”
Step 2. Log in to an existing account (whether through the “My” section or through the “Hamburger” icon)

Step 3. Click on the “Hamburger” icon on the left side of the screen

Actual Result

The system doesn't recognize the user's name after login, and instead, there's a button with the sentence “Hi, There!”

Expected Result

After login, the system should recognize the user's name, and the button “Hi, There!” at the “Hamburger” icon that directs the user to their account, should be written as “Hi, (first name of the user's name)!”.

[OY-14] The screens on different categories under the "Hamburger" take 3-4 seconds to load Created: 21/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Major
-----------	--------------

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Click on the “Hamburger” icon

Step 3. Click on the categories “K-Pop”, “Accessories”, or the other categories with a pop-up beforehand, like “Skincare”

Actual Result

The screens of the selected categories load up pretty slowly (around 3-4 seconds), which can affect the user experience.

Expected Result

The screen of the selected categories should load up quickly and smoothly, not more than 1-2 seconds.

[OY-15] The categories under the "Hamburger" icon are not consistent by functionality (some have pop-ups, some not) Created: 21/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium

Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	<p>Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers</p>		

Attachments:**Severity:**

Major

Description**Steps to Reproduce**

- Step 1. Open the app “Olive Young”
- Step 2. Click on the “Hamburger” icon
- Step 3. Click on the following categories: “Skincare”, “Makeup”, “Bath & Body”, “Hair”, “Face Masks”, and “Suncare”.
- Step 4. Now click on the following categories: “K-Pop”, “Makeup Brush & Tools”, “Accessories”, “Wellness”, “Men’s Care”, “Supplements”, “Food & Drink”, and “Special Value Sets”.

Actual Result

The categories mentioned on Step 3 have a pop-up with different products of the same category, though the rest of the categories mentioned on Step 4 do not.

Expected Result

All the categories should have the same pattern - either open a popup of different types of products of the same category and then direct to a screen by choice, or all open a general screen of the same category instantly.

[OY-16] Each category screen in the 'Top Strip' section takes approximately 3-4 seconds to fully load Created: 21/Jun/25 Updated: 21/Jun/25

Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Major
-----------	-------

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Choose an item from “Home Screen” and click “Add to Cart”
- Step 3. Click “Proceed to Cart”
- Step 4. Click on + / - of the quantity of the added item in “Cart”

Actual Result

There's a loading icon in the middle of the screen which takes around 2 seconds to disappear and update the quantity according to the chosen action.

Expected Result

The quantity of the item should be updated immediately with no delay.

[OY-19] In Checkout, the user can provide an invalid address with numbers only

Created: 21/Jun/25 Updated: 21/Jun/25

Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	<p>Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers</p>		

Severity:	Critical
-----------	----------

Description

Steps to Reproduce

- Step 1. Open the app “Olive Young”
- Step 2. Choose an item from “Home Screen” and click “Add to Cart”
- Step 3. Click “Proceed to Cart”
- Step 4. Click “Proceed to Checkout”
- Step 5. Fill the required fields and wait 15-20 minutes without any interaction.

Actual Result

The session remains active indefinitely; the user can complete the checkout even after long inactivity.

Expected Result

The session should expire after a certain period of inactivity (e.g., 15–20 minutes), requiring the user to re-authenticate or restart the checkout for security.

[OY-23] The time it takes for "Checkout" to fully load is around 3 seconds

Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Major
-----------	-------

Description

Steps to Reproduce

- Step 1. Launch the app “Olive Young”
- Step 2. Wait for the “Home Screen” to load

Actual Result

The images are loading too slow, the user can see the frame of the image before it renders the image itself and a consistent “loading animation” is shown.

Expected Result

The content should load between 1-2 seconds, to ensure the user experience.

[OY-27] Cart items are lost after user registration Created: 21/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Major
-----------	--------------

Description**Steps to Reproduce**

1. Launch “Olive Young” on Mobile
2. Add multiple items to the shopping cart as a guest
3. Proceed to register a new account or log in
4. After successful registration/login, return to the cart

Actual Result

All cart items disappear after registration, and the cart is empty.

Expected Result

Items added to the cart before registration should persist and remain in the cart after the user registers or logs in.

[OY-28] **Product removed from cart at checkout without notification due to being out of stock** Created: 21/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	High

Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Major
-----------	-------

Description

Steps to Reproduce

- Step 1. Launch the app “Olive Young”
- Step 2. Choose multiple items from “Home Screen” and click “Add to Cart”
- Step 3. Click “Proceed to Cart”
- Step 4. Click “Proceed to Checkout”
- Step 5. Review the order summary right before payment

Actual Result

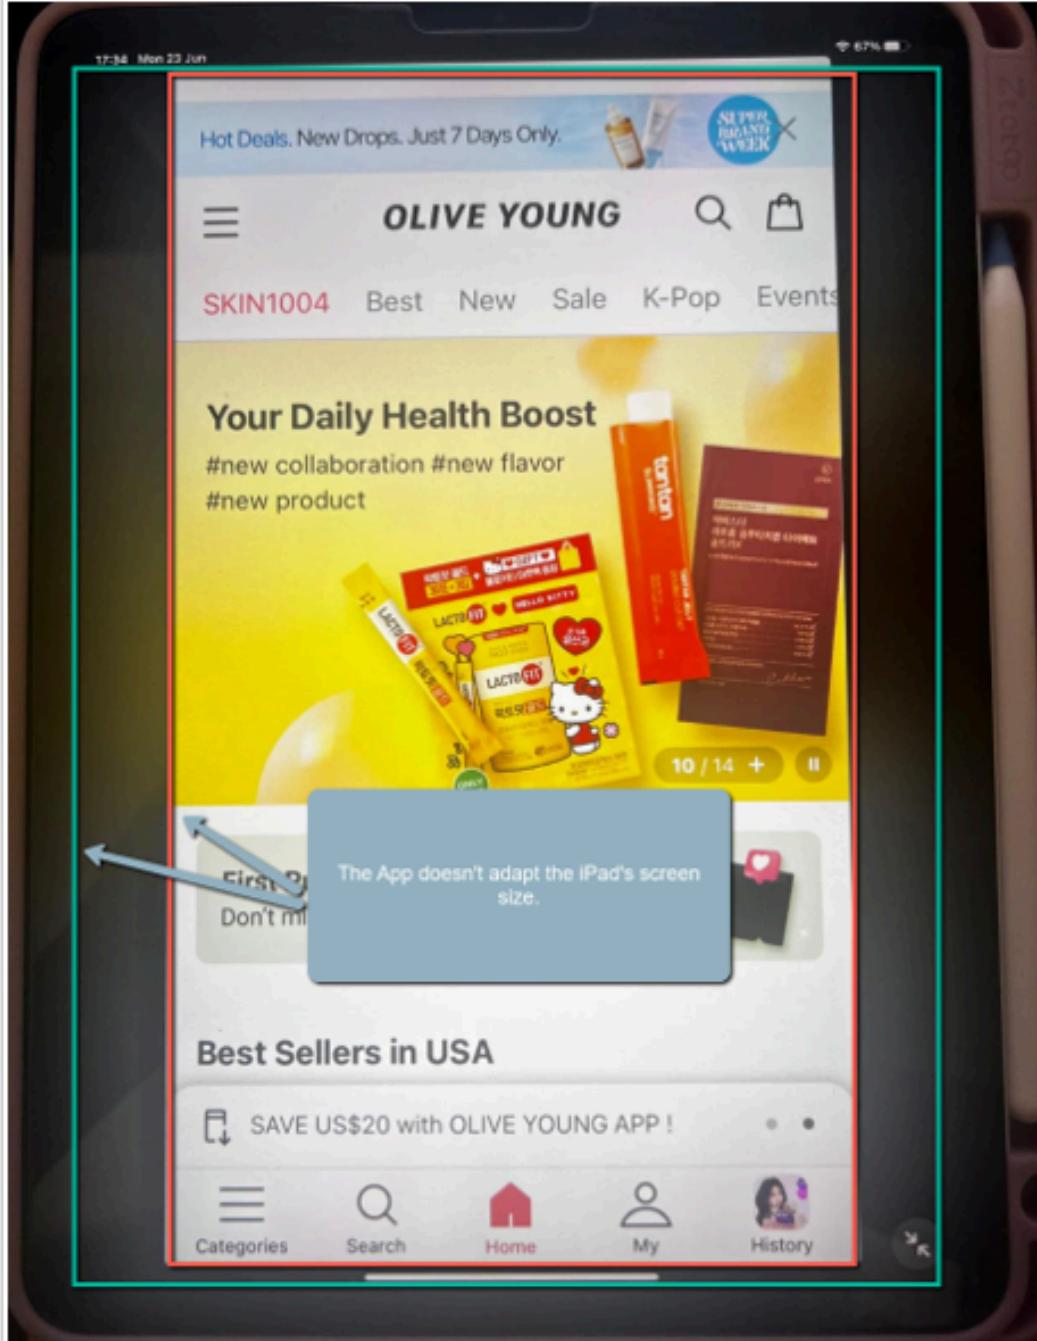

One item was removed from the cart silently at the final stage of checkout, without any alert or message indicating it was out of stock.

Expected Result

If an item is out of stock, the user should be clearly notified **before** or **during** checkout that the item was removed, with a visible message explaining the reason.

[OY-29] Display resolution not optimized for iPad devices	Created: 23/Jun/25 Updated:
23/Jun/25	
Status:	To Do

Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Device: iPad Pro (11-inch) Operating System: iOS Internet: Wi-Fi 1GB Fibers		

Attachments:**Severity:****Major****Description****Steps to Reproduce**

- Step 1. Install and open the Olive Young app on any iPad device
- Step 2. Navigate through various screens (e.g., Home, Product Page, Cart)
- Step 3. Observe how the layout and elements appear

Actual Result

The layout does not adjust appropriately to the iPad screen dimensions.

Expected Result

The app should adapt responsively to iPad screen sizes, maintaining proper alignment, spacing, and scaling of UI elements.

[OY-30] [App crashes randomly during Sign In on iPad devices](#) Created:

23/Jun/25 Updated: 23/Jun/25
